

Control-M Output Management

Quickly and securely collect, distribute, and archive reports from multiple platforms

PRODUCT DESCRIPTION

Control-M Output Management is a web-based application that collects data from multiple systems and saves and archives reports in the central IBM® z/OS®-based repository or on distributed platforms. Using a web interface, you can create reports in multiple output formats, manage access and distribution, and archive reports for an extended period of time.

BUSINESS CHALLENGE

Business users, partners, and customers need quick access to the most relevant information. Collecting data, formatting reports, distributing and managing access to the reports, and archiving reports for future access is often a muddled, time-consuming process. Managing a large volume of archived reports and who can access those reports creates a more difficult challenge.

BMC SOLUTION

Control-M delivers the next wave of IT automation—Digital Business Automation—moving beyond traditional workload automation and adapting to modern IT technologies and processes. **Control-M Output Management allows users to quickly collect data from multiple systems to create and format reports and archives saved reports, allowing quick, secure access and efficient, low-cost distribution to end users.** The convenient web interface provides anytime, anywhere access for authorized business users.

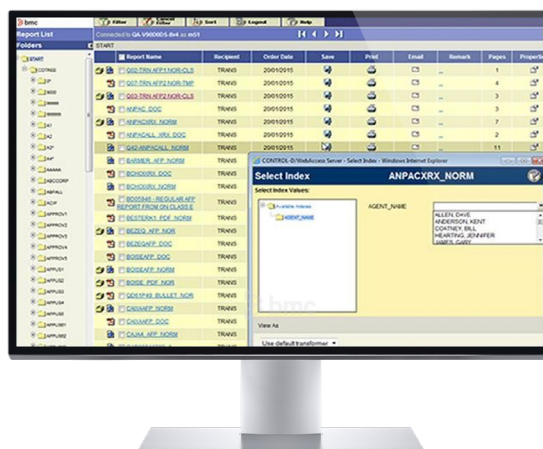

KEY FEATURES

Control-M Output Management allows you to easily collect, distribute, and archive reports.

- **Collecting** – Collect reports from various platforms in different formats
- **Archiving** – Archive reports for an extended period of time, according to predefined retention criteria
- **Distributing** – Efficiently distribute saved reports to end users, manually or via automated scheduling

KEY BENEFITS

- **Quickly collect relevant data** with automated output capture
- **Securely distribute reports** by managing permissions to access reports
- **Allow specific users to access reports** with ease through a web interface
- **Reduce printing and report distribution costs** by using electronic reports and documents

- Quickly access and distribute reports, invoices, statements, and other business documents using the Control-M Output Management web-based application.

PRODUCT DETAILS

Control-M Output Management automates every aspect of report management—regardless of the source application, originating platform, storage medium, or report format. Business users are able to access application-generated documents, such as invoices and customer billing statements, or tabular reports, such as trial balances and inventory, from familiar 3270-based interfaces—TSO, ISPF, or VTAM applications.

Fully automated: Eliminate the need to run sweep jobs with fully automated output capture.

Secure access: Assign permissions to users and groups to access full reports or specific sections of reports.

Access to archived reports: Access archived documents faster and optimize storage by putting fewer items in temporary storage.

Streamlined printing: Format complex print streams to view and print content as a PDF on a local printer.
